Independent Advice

The most important factor in making real-world decisions for high-value assets is the availability of unbiased advice. When parties have a financial interest in the outcome, independent advice can be essential in finding the right answer among differing opinions. Using a Third Party Engineer can be useful throughout the plant's operating life, including:

- Design Specification
- Fabrication
- Construction / Assembly
- Commissioning
- Operation
- Removal From Service

Specialist Engineers

Tetra Engineering has a long history providing engineering advice in the Power Sector. We are regularly called to assist in cases of:

- Warranty Claims
- Legal Disputes
- Due Diligence Assessments
- Quality Systems Investigation
